

## Burlington Northern and Santa Fe Railway (BNSF) Former Maintenance and Fueling Facility – Skykomish Site

You are invited to a community meeting on *institutional controls* (measures taken to protect people, pets, and the environment from coming into contact with hazardous substances left behind after a cleanup is completed). A handout is included with this mailing to answer some questions that you might have about this subject. Ecology staff will present the topic and a discussion will follow.

In October and December 2002, Washington State Department of Ecology staff presented cleanup technologies that may be used at the site individually or in combination (handouts on these are available for review at the library or by contacting us). Other technologies are still under consideration.

We hope that this information will help prepare you to provide input on the Remedial Investigation and Feasibility Study/Environmental Impact Statement (August 2003). These reports will describe the extent of contamination and cleanup options for the site, as well as possible environmental impacts of the cleanup.

### **INSTITUTIONAL CONTROLS COMMUNITY MEETING**

**February 27, 2003**

**6:30 – 8:00 PM**

**Skykomish Community Center  
114 West Railroad Avenue, Skykomish**
